PROFILE

Flutter Developer with 3+ years of experience building cross-platform mobile and web apps with Flutter and Dart. I have shipped products ranging from multi-branch POS and retail platforms to real-time marketplaces and live radio streaming. I focus on clean architecture, smooth and animated user interfaces, and reliable backends with Firebase, Supabase and REST APIs, and I work closely with designers, QA and project managers to deliver on time.

EXPERIENCE

Softech Square Software Solutions Pvt Ltd, Flutter Developer

Sep/2023-present
FF 103 Deans Peshawar

- Build and maintain cross-platform Flutter apps for clients, from first design through release on Google Play and the App Store.
- Write clean, maintainable code following clean architecture and SOLID principles, with state management in BLoC, Riverpod, Provider and GetX.
- Integrate REST APIs, Firebase, Supabase and third-party libraries, with offline storage using Hive and Sqflite.
- Turn Figma and XD designs into responsive interfaces with smooth custom animations.
- Collaborate with UX designers, QA teams and project managers across the full SDLC to deliver projects on time.

PROJECTS

Jan Ghani Mart – Retail Store & Business Management · janghani.store
Description: Built a retail platform for a multi-branch store: an online shop selling on easy installments, plus POS, inventory, purchasing, staff and cash management, detailed reports, and an AI assistant that answers business questions in plain language.
Technology: Flutter Web, Dart, Supabase, Riverpod, PDF & Excel export, Barcode.

PAO – Give-Away Marketplace · Google Play
Description: Built a give-away marketplace where users list unwanted items for free, request items, and arrange handoffs through real-time chat with voice and media messages, ratings and push notifications. Published on Google Play.
Technology: Flutter, Supabase, Supabase Realtime, Provider, Firebase Messaging, Hive.

Safi Shoes – Point of Sale (POS) System
Description: Developed a POS system for a footwear business that manages sales, purchases, returns and stock across multiple branches and warehouses, with role-based access and detailed reports.
Technology: Flutter, GetX, REST API, Sqflite, HTTP, Postman.

WFM91.7 Women Radio · Google Play
Description: Co-developed a live-streaming radio app for WFM91.7, a Nigerian women's radio station, serving 500+ concurrent listeners with high-quality audio.
Technology: Flutter, Firebase, Dart, Provider.

SKILLS

Flutter framework:
Material Widgets, Cupertino Widgets, Firebase, Supabase, Xcode, BLOC, Riverpod, Provider, GetX, Hive, Sqflite, Rest API, Extensions widget, Implicit Animations, Explicit Built-in Animations, Apple Store, Google Play
